PRE-PREPARATORY
SCHOOL FOR BOYS
INCLUDING THE EARLY YEARS FOUNDATION STAGE**

INTIMATE CARE POLICY

Last update/review: September 2011

Aims

The School and Alpha Plus will act in accordance with Section 175 of the Education Act 2002 and 'Safeguarding Children and Safer Recruitment in Education' (DfES 2006) to safeguard and promote the welfare of pupils at this school.

This school takes seriously its responsibility to safeguard and promote the welfare of the children and young people in its care. Meeting a pupil's intimate care needs is one aspect of safeguarding.

Alpha Plus recognises its duties and responsibilities in relation to the Disability Discrimination Act which requires that any child with an impairment that affects his/her ability to carry out day-to-day activities must not be discriminated against.

This intimate care policy should be read in conjunction with the following:

- The Falcons School Safeguarding policy
- health and safety policy and procedures
- policy for health and first aid
- Special Educational Needs policy
- Physical restraint policy
- Staff code of conduct or guidance on safe working practice.

The Falcons School is committed to ensuring that all staff responsible for the intimate care of children will undertake their duties in a professional manner at all times. It is acknowledged that these adults are in a position of great trust.

The Falcons School recognises that there is a need to treat all children, whatever their age, gender, disability, religion or ethnicity, with respect when intimate care is given. The child's welfare and dignity is of paramount importance. No child should be attended to in a way that causes distress or pain.

Staff will work in close partnership with parent/carers to share information and provide continuity of care.

Definition

Intimate care can be defined as any care which involves washing, touching or carrying out a procedure to intimate personal areas which most people usually carry out themselves but some children are unable to do because of their young age, physical difficulties or other special needs. Examples include care associated with continence or more ordinary tasks such as help with washing, toileting or dressing. It also includes supervision of children involved in intimate self-care.

Best Practice

Staff who provide intimate care at The Falcons School are trained to do so including child protection and health and safety training and are fully aware of best practice regarding infection control, including the need to wear disposable gloves and aprons where appropriate.

There is careful communication with each child who needs help with intimate care in line with their preferred means of communication (verbal, symbolic, etc.) to discuss their needs and preferences. Where the child is of an appropriate age and level of understanding permission should be sought before starting an intimate procedure.

All children will be supported to achieve the highest level of autonomy that is possible given their age and abilities. Staff will encourage each child to do as much for his/herself as possible.

Every child's right to privacy will be respected. Careful consideration will be given to each child's situation to determine how many carers might need to be present when a child needs help with intimate care. Adults who assist children one-to-one should be employees of the school and be CRB checked at the appropriate level.

It is not always practical for two members of staff to assist with an intimate procedure and also this does not take account of the child's privacy. It is advisable, however, for a member of staff to inform another adult when they are going to assist a child with intimate care and for the second adult to remain in close proximity.

The religious views and cultural values of families should be taken into account, particularly as they might affect certain practices or determine the gender of the carer.

All staff should be aware of the school's confidentiality policy. Sensitive information will be shared only with those who need to know.

If necessary, advice should be taken from the local council regarding disposal of large amounts of waste products.

Child Protection

The school's child protection policy and inter-agency child protection procedures will be accessible to staff and adhered to.

From a child protection perspective it is acknowledged that intimate care involves risks for children and adults as it may involve staff touching private parts of a child's body. It may be unrealistic to expect to eliminate these risks completely but in this school best practice will

be promoted and all adults will be encouraged to be vigilant at all times.

Where appropriate, all children will be taught personal safety skills carefully matched to their level of development and understanding.

If a member of staff has any concerns about physical changes in a child's presentation, e.g. unexplained marks, bruises, soreness etc s/he will immediately report concerns to the Headteacher or designated senior person for child protection (Mrs MacDonald) A clear written record of the concern will be completed and a referral made to Children's Services Social Care if necessary, in accordance with inter-agency procedures. Parents will be asked for their consent or informed that a referral is necessary prior to it being made unless it is considered that to do so will place the child at risk of harm.

If a child becomes distressed or very unhappy about being cared for by a particular member of staff, this should be reported to the class teacher or Headteacher. The matter will be investigated at an appropriate level (usually the Headteacher) and outcomes recorded. Parents/carers will be contacted at the earliest opportunity as part of this process in order to reach a resolution. Staffing schedules will be altered until the issue(s) are resolved so that the child's needs remain paramount. Further advice will be taken from outside agencies if necessary.
